

ALL SENSORS®

PRESS RELEASE *For Immediate Release*

ASCX Series Compatible Pressure Sensor

June 2006

All Sensors Corporation of Morgan Hill, California has announced the introduction of a drop-in replacement to the Honeywell/Sensym ASCX Series pressure sensor. This announcement provides customers an alternative source to the ASCX Series pressure sensor occasionally manufactured by Honeywell. The ASCX Series Compatible pressure sensor is currently available from stock affording customers fast delivery times.

Package Features

The ASCX Series Compatible pressure sensor features All Sensors' innovative packaging designed to reduce package induced parasitic stress and strain. Pressure ports, mounting holes, and pin geometry are mechanically compatible to the Honeywell ASCX Series pressure sensor. These package features allow engineers to substitute the Honeywell ASCX pressure sensor without mechanical restraints.

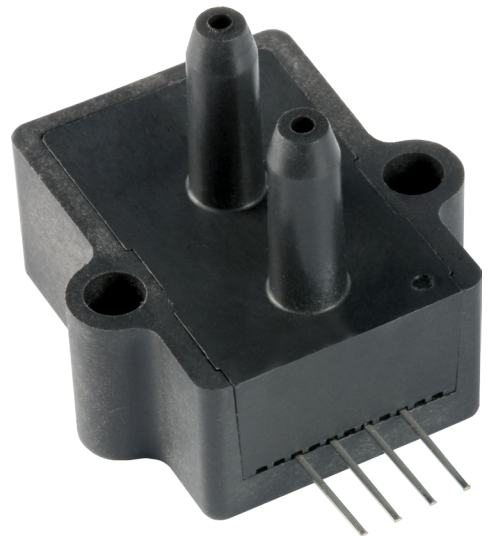

Electrical Features

The ASCX Series Compatible pressure sensor has a ratiometric output span of 4.5 volts at a 5-volt supply. Pressure ranges are available from 1 PSI to 100 PSI. The 4-pin out design is electrically compatible to the ASCX Series pressure sensor. Pressure characteristics including temperature effects of offset as well as output span are also comparable or exceed the ASCX Series pressure sensor.
