PRESS RELEASE  
*For Immediate Release*

# All Sensors Offers Discontinued Honeywell Pressure Sensor Replacements

*July 2016*

All Sensors Corporation is a leading manufacturer of MEMS piezoresistive pressure sensors and pressure transducers. Our company goal is to manufacture high accuracy, quality pressure sensors that provide customers with the ideal sensor solution.

By combining both the resources and capabilities of the business development/engineering team, All Sensors has created replacement Honeywell parts as a cost-effective solution for their customers. This will be a critical move in the next few months because as of August 31<sup>st</sup>, 2016, Honeywell will discontinue some of its Advance Silicon Group board mount pressure sensors. The affected product families include CPCL, CPXL, CPC, DUXL, DCXL, XCX, and XCXL Series.

The All Sensors website contains comprehensive specs about Honeywell's replacement parts. Through the user friendly site, any part can be referenced with the click of a mouse, and each part can be immediately ordered for shipment. Simply go to our products page: <http://www.allsensors.com/products> and type in the Honeywell family series to see if we have a drop-in replacement for the part you seek.

### **Price**

Contact factory for price. Samples are available for product testing.
